

SHAPE SERIES

Designer Kim Nadel

The SHAPE Series is an indoor/outdoor collection of modern furniture - barstools, benches and occasional tables - made exclusively from locally sourced, reclaimed and recycled content materials.

Tops and seats are readily available in three materials:

Reclaimed Solid Walnut in a Natural Finish

Reclaimed Black Locust in a Natural Finish [indoor/outdoor use]

Eco-Friendly Concrete in Warm White [indoor/outdoor use]

Frame:

Brushed Stainless Steel

The furniture is built and assembled with traditional techniques to create a new eco-aesthetic in modern design. All furniture is handcrafted so that each piece is unique.

Custom sizes and additional finish options are available upon request.
